PROFILE SUMMARY

Flutter Developer with production experience building and maintaining cross-platform iOS and Android apps in Dart. Strong in state management (Bloc, Riverpod, Provider), REST API integration, Firebase, and third-party SDKs such as Agora and Pusher. Progressed from trainee to intern to full-time engineer, working in agile teams alongside backend and DevOps engineers.

EXPERIENCE

Lilac Infotech | Associate Software Engineer 02/2026 – Present | Calicut, Kerala

- Built and deployed cross-platform Flutter apps for iOS and Android, using Bloc, Riverpod and Provider for scalable state management
- Integrated Agora SDK for video/audio streaming and Pusher for real-time WebSocket notifications
- Integrated REST APIs and collaborated with DevOps and Laravel engineers on CI/CD workflows in an agile team
- Debugged issues and improved performance in existing production apps

Tomercon Developers | Flutter Developer Intern 04/2025 – 09/2025

- Built and maintained Flutter apps, working with senior developers on features, bug fixes, and performance
- Implemented Firebase (Auth, Firestore) integration, state management with Provider/Bloc, and REST API consumption

HACA (Haris & Co. Academy) | Flutter Developer Trainee 07/2024 – 12/2024

- Completed 6-month Flutter/Dart training program; built a Student Management System as final project

EDUCATION

University of Calicut 08/2020 – 06/2024

Bachelor of Commerce (B.Com), Specialization in Computer Applications

SKILLS

Mobile: Flutter, Dart, iOS & Android

State Management: Bloc, Riverpod, Provider, GetX

Backend & Integration: REST APIs, Firebase (Auth, Firestore), Agora SDK, Pusher (WebSocket), Razorpay

Tools & Other: Git, CI/CD, HTML/CSS/JS, AI Prompt Engineering (Certified)

PROJECTS

Solo Gadget Mart | Next.js, Supabase, Razorpay

- Full-stack e-commerce platform with admin dashboard, WebSocket order alerts, and global cart state management

Lume Jewellery | Flutter Web, Firebase, Provider, Razorpay

- Serverless e-commerce web app with Razorpay checkout and Firestore transactions for concurrent inventory management
